Bulletin Job Office, 15-6.
Williamson Office, Room 2, Murray Building, Telephone, 210.

Norwich, Thursday, July 1, 1909.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 3,000 of the 4,000 houses in Norwich, and to ninety-three per cent. of the people. In Windham it is delivered to over 900 houses. In Putnam and Danielson to over 1,000, and in all of the places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and forty-five post office districts and forty-one rural free delivery routes. The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

1901, average.....	4,412
1905, average.....	5,920
1906, average.....	6,559
1907, average.....	7,179
1908, average.....	7,543
June 28.....	7,583

ATTENTION!

Will persons who took part in the parade in 1909, on the occasion of the centennial celebration, send their names in to The Bulletin?

PROSPERITY BREEZES.

It is pleasant to note that some of the old-fashioned farmers of the country have a new prospecting upon which to venture. "The prosperity breeze blows." The season of the tariff and the "tariff" is quite a barrier to the kind of a breeze-in fact, it has been regarded as an actual step-back, but it isn't. After all that has been said and done, J. Ogden Armour is said to use so many signs of prosperity that it is difficult to find a single one that is not a sign of prosperity. "The increased acreage under cultivation, encouraged as it has been by the high prices for all farm products, together with the bumper crop indicated at present, promises the farmer a rich harvest in cash, and that really is the basis of all prosperity in the country."

Of course, this declaration of Armour's was not needed. The men who have followed the fate of the furrow since Ceres stirred the upturned brown soil and caused the tender blades to shoot have been finding that breeze with the prosperity anticipation breeze.

It is being noted that recuperation is being written large and illuminant all over the western landscape and that Gen. Prosperity and his forces will soon shake a cornucopia of coins into the lap of the country. We like to hear this and we hope soon to fully realize it.

THE LUMBER BUSINESS.

The American who thinks that the lumber business is a great industry is indulging in no pipe dream. He is conscious of the truth in the abstract as he does not have the proof in his tall. Once more the figures are out and the report is not a top-notch one. It shows a lively time in the lumber world.

A bulletin of the bureau of the census covering the year ending 1908 shows that there are 31,221 sawmills in the United States that manufactured 33,299,999,000 feet of lumber. These mills also cut 12,106,492,000 shingles and 2,965,664,000 laths. Lumber manufacturing, like every other industry, felt the effects of the business depression which began in October, 1907. Consequently the production in 1908 was below that for the previous year. In 1907 the cut of 28,850 sawmills was 40,200,254,000 feet, the highest production ever recorded. Notwithstanding, therefore, that in 1908 reports were received from eight per cent. more mills than in 1907, the decrease in lumber cut reported by them was slightly over seventeen per cent.

THE WRIGHTS' RIGHT.

There was wide disappointment because the Wright brothers declined to take risks this week. Fort Myer under unfavorable conditions. They thought it was an indignity to disregard the wishes of such a large and distinguished company of spectators, but the purpose of the business they are in is to establish the fact that air navigation is possible and safe, not that the aeroplane is a toy and a peril when Old Boreas gets a little furious. They had their interests to protect which is of greater importance to them than any person's or assembly of persons' desire to see things. Their discipline in overcoming past trials and dangers has doubtless taught them that it pays to be firm in the presence of foolishness. They know their business and the power as well as perils of the aeroplane and they sense when the conditions are such that wisdom is shown by remaining on the ground and admiring the sky.

It is also said that the Wright brothers will bid who ever purchases an aeroplane of them not to sail over cities, as the possibility of some one falling with or out of his plane upon the streets of a city might be disastrous to any unfortunate dweller in the same upon whom he or it or both might alight. Damage to the aeroplane can be repaired by the Wrights, but a mangled street or sidewalk would give the business a bad name.

If this is true they are giving evidence of rare good sense. They are doing what they can to prevent another aeroplane from knocking down chimneys and landing in back yards.

AVERAGE HEEDLESSNESS.

We wish that it did not seem to be clearly proven that the average heedlessness numerically exceeds the average man. We do not know how common he is, and have no desire to get anything more definite about the carelessness of the people.

The Bulletin has published hundreds of times for the benefit of its readers the rules governing correspondence and preventing good things from going right into the waste basket, but few mind them, and those who do not lose the opportunity they seek and charge us with the stupidity of which they are really guilty.

The government's rules are directed in the same way. The postal instructions are disregarded and a large loss to the people is made through their lack of enlightenment. Instructions have been many times printed that unsolicited or frosted post cards will not be sent through the mails unless tightly closed in sealed envelopes; people continue to mail them and perhaps often wonder why they are not delivered. It is said that from 15,000 to 20,000 of such cards are being sent to the dead letter office daily. In addition to refusing to enclose many such cards in an envelope some use a poor quality of envelope which permits particles of mica and other substances to escape and cause injury to the eyes of the clerks in the postal card. A daily loss of \$50 or \$200 a day for carelessness is a large tax for a poor thing.

HIGH JINKS AT SEA.

The Atlantic naval fleet is getting ready for its summer practice off the coast and near New Man's Land where the annual target practice takes place. The fleet is assembling near Fortress Monroe in the Chesapeake bay and the full force of ships will number fifty, or thereabouts.

We get news from Washington that for the first time in naval maneuvers in this country there will be something in the nature of a running fight on the open sea. While it will be a one-sided engagement, with no danger whatever to the attacking ships, it will test the marksmanship of the battleship gunners. Two discarded torpedo boats are to be towed rapidly at long range, and only the chance for a wing shot will be offered. The maneuvers will be expected to develop the efficiency of the gunners, as well as determine the capabilities of the ships and the guns.

There is going to be a high old time off Martha's Vineyard and off the Rhode Island, Connecticut and New York coasts.

It is the purpose of these maneuvers to test the degree of utility which, in actual warfare, may be expected to attach to torpedo boats and submarines. There are many naval critics who do not rate highly the potential capabilities of the mosquito fleets. They take the view that only by rare chance will a torpedo boat be able to deliver a blow against a watchful enemy and that the chance for a submarine to strike from below will be even less. It is claimed that it should be possible, in hypothetical warfare, to determine with some approach to exactness whether the small craft are indispensable or practically useless.

EDITORIAL NOTES.

As a political ringmaster Senator Aldrich has made a splendid manifestation of his power.

We are all glad that the tariff debate is ended; but the next thing is for the conferees to get hot.

There can be no more June brides for 1909. Their day is over and opportunity has closed the door.

Do not think that the world is all awry, for that is only evidence that one's digestion is not all right.

Strange that a hot wave always has to have death-toll from the cities; and it is usually the infant or enfeebled.

The electric fan could do not have as much excuse for existence as hay-fever, but it makes himself felt audaciously.

Narragansett bay breezes are once more in popular demand. There is nothing that fits much better these hot days.

A cool morning in July is always appreciated, but it is a feeble thing compared to the cool morning in late September.

Senator Aldrich hopes that congress will be able to adjourn by July 15th. If the senate is a yielding body, congress may.

The fact that the czar of the Russian is being trailed by anarchists may excite others, but it is a natural condition for him.

Happy thought for today: A united spirit is what makes the most perfect anniversary celebration. We are all going to get together.

Mrs. Gould favors an income tax, but she could not prevail upon the court to apply it quite as heavy as she thought was necessary.

People who talk over the backyard fence do not see that there is any reason why they should seek to converse with the inhabitants of Mars.

Norwich is willing that the cool breezes should play on her campus from now until July 8th. In fact, they will be her most welcome guests.

It is pleasant to think that the open car is going to be with us all summer, and that the mid-evening rides are going to prepare the way for restful sleep.

These professional dressers of buildings and streets can dress up a city quicker than a finicky woman can prepare herself to start for an important social function.

Down in Georgia they have a bill before the legislature to make mosquito bars compulsory. Those who have stopped at Jersey hotels think that would be a good law in that state.

Ought to Be Easy.
It is up to Taft now to decide "when is whiskey not whiskey?" This may not be so difficult, since he has studied the analogous question, "When is revision not revision?"—Philadelphia North American.

It Makes a Difference.
Whether evidence is evidence or not evidently depends on who is attorney at the time it is submitted.—Washington Times.

Woman in Life and in the Kitchen

NEEDLEWORK SUGGESTIONS.

TO REMOVE FRUIT STAINS.

Take up some cream of tartar in the stained part, and then put the linen into a lather of soap and cold water and boil for a while. Then transfer it to lukewarm water, wash and rinse well and dry in bright sun. Either fruit or wine stains will be extracted by this process.

A simpler method is to rub the stains when newly made with common salt. A third is to mix in equal quantities soft soap and ammonia and slacked lime. Rub the stains with this, and expose the linen to the sun with the mixture between the folds. As soon as the stain has disappeared wash out the linen immediately as it will be injured if the mixture is left on too long.

HINTS TO OBSERVE WHEN PACKING.
Every delicate garment should be wrapped separately.
For this towels or sheets of tissue paper will serve, but they should be pinned into place.
Folds of newspapers should be placed between the layers of the more perishable things.
The newspaper is very good, because it is so unyielding that wrinkles and bumps cannot dent it enough to mark the fabric beneath.
It is useless to try and keep all the heavy things at the bottom, the light ones at the top. The trunk will probably be stood on end or upside down half the time.
Newspapers are better than anything else for stuffing out bows and sleeves.
Tie in bottle corks well and put the bottles in the middle of compartments and if packed solidly they will carry all around the world.

HOME HINTS.
To remove ink spots, soak well in milk, sweet or sour, and rub between the hands and the milk before putting the garment into the water.

Some do not like butter-milk, but it is a taste that is not hard to acquire, and it is a most refreshing drink for summer time. It is also excellent for the complexion, is easily digested, very nutritive, and also inexpensive.

Cut your oolichol four inches longer than your kitchen table, and paste smoothly on the top with thick flour paste. When the top is dry, paste the edges under. Your table will always look better, and the oolichol will last longer than if left loose.

One-half cup jelly or jam mixed with one fourth of Spanish water, nut meats cut fine. Spread between thin buttered bread.

During the season when eggs are plenty and cheap it is well to pack them, small and down, in a box, never allowing the lid to be closed until they are covered with coarse salt. Some use oats to pack in and keep in a cool place.

To tell good eggs, put them in water. If the large end turns up, they are not fresh. This rule is infallible.

Rub boots and shoes that have been made hard and stiff by water with kerosene. It will make them as pliable as when new.

MAKE BABY'S BONNET FROM HANDKERCHIEF.
There are several ways of fashioning bonnets for baby from a handkerchief.

One of the simplest and prettiest is made as follows: Take the handkerchief, one edged with val and bow-tie, perhaps a little embroidered, is best—and fold it through the middle.

Now fold the corners down to the outside edge, and you will have a triangle meeting on the longest side.

Next turn back the points from the middle fold to the outside side and catch them there at once with a stitch or two.

Turn the top point down toward the bottom just in the side fold, and catch it through one thickness of the handkerchief.

Slip the hand between the two large folds of the handkerchief and you will see that your bonnet is made.

The fold to which the points are tucked make the top of the bonnet, which follows the outline of baby's face.

The other fold is the back. That this will fit into the shape of the head, lay a tiny box plait on the under side—it will look, of course, from the outside, like a tiny plait turned toward each other.

Amethysts for Brides.
Amethyst is the proper precious stone for the bride. It is set in every imaginable piece of jewelry.

Belt buckles, necklaces, hatpins and stickpins are ablaze with amethysts. To help the faded stockings, shoes, parasols and gowns in amethyst shade threaten to become so numerous as to be overpowering as the season advances.

IN THE KITCHEN.

Baked Chicken and Potatoes.
Split the young chicken down the back after trimming and trussing; wipe with a damp cloth, then lay skin side up in the baking pan; rub with melted butter and use with salt, pepper and flour and put in hot oven for from 20 to 30 minutes, adding a little hot water to baste, if necessary.

Tomato Omelet.
Take the pulp from five ripe tomatoes, chop sufficiently to remove the lumps; mix two tablespoons of cornstarch with a little cold milk, beat two eggs, add the milk and the pulp of five eggs, and the milk add pulp, season with pepper, salt, and a tablespoon of melted butter, add the beaten whites of the eggs and turn into a frying pan in which is hot butter, fry until a pretty brown, fold and served garnished with potato balls.

Pretty Neckwear Seen.
Among the hundreds of styles in dainty neckwear and dress accessories seen in the shops this spring, the prettiest for morning wear are the turnover collar and cuffs.

These are fashioned from plain white lawn hemmed with delicate lace.

TO CURE ANY DISEASE.
The Cause Must be Removed, Same Way With Deadness.

Kill the germ that causes dandruff, falling hair and baldness, you will have no more dandruff, and your hair must grow luxuriantly. Newbro's Herpicide not only contains the dandruff germ destroyer, but it is also a most delightful hair dressing for regular toilet use.

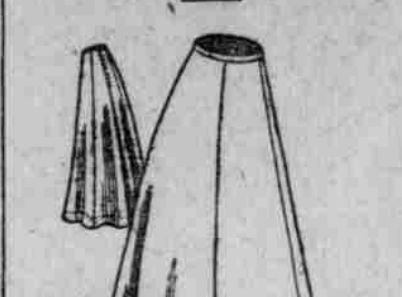

No other hair preparation is on this scientific basis of destroying the dandruff germ. It stops all irritation, keeps the scalp sweet, pure and wholesome. Remember that something claimed to be "just as good," will not do the work of genuine Herpicide. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. TWO SHEET-30c, and \$1.00.

The LEO & Osgood Co., Special Agents.

color, the corners worked with mercerized thread in the same tone. These designs—mostly squares or dots—are done in pink, blue, heliotrope and yellow, and are worn with striped waists, following out the color used for trimming the sets or with pure white blouses.

Harmony in Dress.
Hats and shoes of practically every tint known to dress materials make it possible for a woman to dress en suite, so that she may indulge in any hue of dress that pleases her, secure in the knowledge that she may procure accessories to match or harmonize with it.

HOME GARMENT MAKING.
The Bulletin's Pattern Service.

Y. Ancient Tavern of 1647, where all lanes meet.
All roads and lanes lead to ye Ancient Tavern—Love Lane, Mediterranean Lane, Navy Yard Lane, Cranberry Lane, Hammer Brook Lane, Hog Lane, Post-Gager Burying Ground Lane, Quarter Lane, Silvia Lane, Dark Lane.

And Derivative
Grows Hair and we can PROVE IT!

DERIVATIVE is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow abundantly long, strong and beautiful. It at once imparts a sparkling brilliancy and velvety softness to the hair, and a few weeks' use will cause new hair to sprout all over the scalp. Use it every day for a short time, after two or three times a week will be sufficient to complete whatever growth you desire.

A lady from St. Paul writes in substance, as follows:
"When I began using Derivative my hair would not come to my shoulders and now it is as long as my hips!"

Another from Newark, N. J.
"I have been using Derivative regularly, and I am so pleased with the results that I have now I have the most beautiful and thick hair anyone would want to have."

NOW at all druggists in three sizes 25c, 50c and \$1.00 per bottle
Derivative enjoys a greater sale than any other hair preparation of kind or brand, and it has a much greater sale than all of the other hair preparations in the world combined.

FREE To show how quickly Derivative acts, we will send a large sample bottle free to anyone who sends this free coupon to the KNOXVILLE DERIVATIVE CO., CHICAGO, ILL., with their name and address and 10c in silver or stamps to pay postage.
